

INTRODUCTION TO ROULETTE

In Roulette, you can bet straight up, which means your bet is on any of the 38 single numbers, which include 0 and 00. Also, you can place combination bets—bets divided over a combination of adjoining numbers.

Where you place your chip or chips on the Roulette table is very important because this determines your bet. It is the player's responsibility for proper placement.

The Dealer spins the Roulette Wheel in one direction and a small white ball in the opposite direction. Bets may be placed on the Roulette table until the Dealer announces, "No more bets."

When the ball comes to rest, the Dealer calls out the winning number and places a marker on it. First the table is cleared of losing wagers, and then all winners are paid.

During this time, players should not touch the table. Wait until the Dealer announces, "Place your bets," to put the chips down.

Each player's bet is kept separate from everyone else's because different color chips are used. The value of a stack of colored chips is determined by the player when purchasing the stack or stacks of chips. The value of a stack of colored chips is indicated by a numerical marker button placed on top of a chip of that color. (20 indicates \$20 per stack, 100 indicates \$100 per stack, etc.) These chips must be redeemed before you leave the particular table.

Resorts World Catskills also offers a European-style single "0" Roulette wheel.

STRAIGHT-UP BETS (these are based on the example image)

EXAMPLE	ODDS	POSITION	
A	35 to 1	Straight Up	All numbers including 0 & 00
